Emily Noor Tan

Orthotist and Prosthetist

orthotist-prosthetist@example.test
Melbourne, Australia

Education

Master of Clinical Prosthetics and Orthotics

Kestrel Bay University

2017

Projects

Device handover review

2024

Compared 72 fitting handovers before and after adding a user feedback field. Clinicians could identify recurring fit concerns at the next review without relying on earlier handwritten notes.

Summary

Orthotist and prosthetist providing outpatient assessment, fitting and reviews. Works with patients, physiotherapists and the fabrication team to translate mobility goals into documented device requirements. Checks fit and comfort before agreeing a gradual use and follow-up plan.

Experience

Orthotist and Prosthetist

Banksia Loop Rehabilitation

2021-05 – Present

- Documented limb measurements, mobility goals and agreed fitting criteria across orthotic and prosthetic appointments. Sent workshop drawings for a second check.
- Reviewed staged device use and recorded agreed adjustments with the rehabilitation team. Referred new pain or skin concerns to the relevant clinician for follow-up.
- Tracked workshop corrections across comparable intake periods. Unclear fit specifications fell from 13 to 5 per 60 orders after agreeing a drawing checklist.

Junior Orthotist and Prosthetist

Redgum Harbour Mobility

2018-02 – 2021-04

- Prepared measurements and fit notes under supervision. Checked delivery records against the final specification before each appointment.
- Updated joint review notes with physiotherapists after fitting appointments so patients received consistent information.
