Ravi Senwick

Computer Science Lecturer · Software Foundations

computer-science-lecturer@example.test · Vancouver, Canada

Experience

2021-07 – Present **Computer Science Lecturer**
Alder Sound Polytechnic

- Taught introductory programming to 126 students across three sections. Coordinated a shared weekly plan with the laboratory instructors.
- Introduced a review rubric for code readability and test coverage. Moderated a sample of marking with the course team before returning results.
- Added a resubmission window for two assignments. Checked how often students acted on feedback and discussed findings at the course review.
- Designed accessible lab walkthroughs with keyboard instructions and step-by-step sample inputs for students using assistive technology.

2018-08 – 2021-06 **Computing Laboratory Instructor**
Cascade Briar College

- Prepared weekly Python exercises and recorded common errors to shape the next tutorial.
- Coached project groups through debugging and documented which issues needed instructor review.

Summary

Computer science lecturer teaching introductory programming and software design. Builds practical assignments that make problem decomposition, testing and feedback part of the same learning process.

Education

2018 **MSc Computer Science**
Ironwood Bay University
