Marlon Beckett Ruiz

Electrical Power-Line Technician

electrical-power-line-technician@example.test · Kelowna, Canada

Experience

Senior Line Technician
Osprey Valley Distribution

2021-09 – Present

- Coordinated 34 planned work packages for overhead distribution assets. Reviewed access and material constraints with supervisors before the weekly schedule was issued.
- Standardized closeout photos and work-order notes on two crews. Follow-up requests fell from 19 to 7 across consecutive quarters with comparable planned work volume.
- Briefed incoming crews during storm response. Recorded outstanding defects and conditional authorization in the job log for review by the system operator.

Distribution Line Technician
Greywake Regional Utility

2017-04 – 2021-08

- Supported pole and equipment replacement on rural routes. Logged unexpected asset condition and returned issue records to the planner after each shift.
- Paired apprentices with experienced crew members for field documentation and checked closeout details before supervisor review.

Projects

Feeder asset record reconciliation

2024

Compared surveyed pole identifiers with the planning register and resolved 14 mismatches with mapping staff before design work began. Escalated uncertain locations for a second site check.

Summary

Distribution line technician coordinating planned maintenance, restoration support and field closeouts. Confirms work limits with dispatch, keeps crew records current and documents what remains outstanding at handover.
