Mara Villeneuve

Industrial Machinery Mechanic · Bottling Lines

industrial-machinery-mechanic@example.test
Moncton, Canada

Summary

Industrial machinery mechanic for six bottling lines. Troubleshoots filling and conveying equipment, completes shutdown repairs and records the checks production needs before resuming scheduled runs.

Skills

Mechanical fault finding · Conveyors · Drive alignment · Planned shutdowns · Maintenance work orders

Education

Diploma in Industrial Mechanics
Fundy Shore Technical College
2018

Projects

Belt guide retrofit
2024
Installed a revised guide on two cap conveyors and verified tracking under each production format.

Experience

2021-06 – Present **Industrial Machinery Mechanic**
Copper Estuary Beverage Works

- Diagnosed recurring infeed stoppages using operator reports and wear marks. Replaced worn guides on the affected conveyors and tracked 12 to 4 repeat call-outs over comparable eight-week periods.
- Rebuilt a filler drive assembly during a planned outage. Checked alignment and guard reinstatement, then recorded a loaded restart with the line lead.
- Maintained six bottling lines through weekly inspections and shutdown work. Linked recurring defects to specific assets in the maintenance register so planners could kit replacement parts.

2018-09 – 2021-05 **Maintenance Mechanic Apprentice**
Mica Coast Process Services

- Assisted with bearings, couplings and belt replacements. Verified part numbers against the issued drawings before preparing the repair kit.
- Prepared restart checklists with senior mechanics and recorded leaks and abnormal vibration for follow-up during the next run.
