## Land Surveyor · Cadastral and Construction Surveys

land-surveyor@example.test · Christchurch, New Zealand

### Summary

Land surveyor working across subdivision, civil construction and as-built documentation. Reconciles site observations against control and historic records. Records ambiguous boundary evidence for review by the licensed cadastral surveyor.

### Experience

2021-08 – Present **Land Surveyor**
**Kauri Narrows Survey**

- Led field collection across 32 subdivision lots. Reconciled occupation, surviving marks and historic plans, then submitted unresolved boundary evidence for licensed review.
- Introduced an independent control check before staking. Repeat visits for missing control information fell from 9 to 2 across successive 40-package samples.
- Delivered as-built levels and offsets for three road stages. Marked design discrepancies in the handover and linked each finding to its approved drawing revision.

2018-03 – 2021-07 **Survey Technician**
**Bracken Estuary Geomatics**

- Collected topographic and utility observations for corridor designs. Tagged inaccessible features and separated surveyed positions from supplied service records.
- Compiled a mark recovery register with photographs and reference ties, giving the next crew a field-ready record for construction checks.

### Education

2017 **Bachelor of Surveying**
**Rata Bank Institute of Surveying**

### Skills

Survey control · Boundary evidence · GNSS and total station · As-built checks
