Adelaide, Australia

Education

Master of Landscape Architecture
Wattle Bay Design Institute

2017

Projects

Park renewal and summer shade study
2025

Mapped shade along a 620 m walking loop for summer use. Moved seat locations and selected 48 new trees around retained canopy and known utilities.

Summary

Landscape architect designing civic parks and streetscapes from concept through construction review. Balances shade, planting performance, access and maintenance with civil and irrigation teams. Presents options with the quantities and trade-offs behind them.

Experience

Landscape Architect
Saltbush Threshold Studio

2021-02 – Present

- Led landscape design for two public parks and a station forecourt. Coordinated levels, planting, accessible routes and maintenance access.
- Reduced irrigation demand in the design estimate by 18% against the concept baseline. Documented plant mix and irrigated area so reviewers could check the assumptions.
- Reviewed tender substitutions with the client. Recorded when mature canopy or local stock constraints affected the proposed specification.

Graduate Landscape Designer
Paperbark Basin Design

2018-04 – 2021-01

- Prepared planting plans and coordination drawings for civic streetscapes. Marked clearances and landscape interfaces for civil review.
- Recorded tree establishment issues during site visits and followed up with the contract administrator.

Skills

Public realm design · Planting plans · Shade analysis · Tender review
