Caleb Vincent Owusu

Medical Laboratory Technologist

medical-laboratory-technologist@example.test · Winnipeg, Canada

Summary

Hospital laboratory technologist working in haematology and clinical chemistry. Reviews quality controls, investigates flagged results and documents analytical exceptions. Keeps sample accession, instrument checks and specimen handovers traceable across shifts.

Skills

Quality control review · Specimen traceability · Result verification · Clinical chemistry

Experience

Medical Laboratory Technologist

Prairie Lantern Hospital | 2021-08 – Present

- Performed routine and urgent testing within authorised scope. Verified quality controls before releasing results and held affected batches when checks failed.
- Checked flagged results against previous records and escalated exceptions to the senior technologist. Documented the decision and responsible reviewer.
- Introduced a shift exception log on the chemistry bench. Reduced delayed handovers from 17 to 7 per 80 evening shifts after the bench team adopted it.

Medical Laboratory Technologist

Birchway Diagnostics | 2018-06 – 2021-07

- Verified specimen identifiers at accession and recorded reasons for rejecting or recollecting samples.
- Maintained a control review record and prepared evidence for internal quality audits under the laboratory supervisor.

Projects

Specimen accession audit

2025

Reviewed 360 specimens across two collection sites. Found that incomplete collection times clustered in one handover and agreed a revised check with nursing and the specimen reception team.
