Arlo Jin Bennett

Solar PV Installer

solar-pv-installer@example.test · Adelaide, Australia

Installation record

37 rooftop installations — Completed as part of a residential installation crew in the first 15 months.

14 handover packs — Identified missing serial photos in the first review and added a pre-departure check.

Education

Certificate II in Electrotechnology (Career Start)

Gulfgrass Technical College

2024

Summary

Solar installer with residential rooftop experience supporting layout, racking, module fitting and site handover under a licensed electrician. Confirms site conditions against the design and documents differences before material is cut or mounted. Brings warehouse experience in stock reconciliation and job-kit preparation.

Experience

Solar PV Installer

Brightbanks Residential Solar

2025-05 – Present

- Completed 37 rooftop installations with a licensed electrician and crew lead. Checked the drawing against panel clearance, roof access and obstructions and referred layout differences before work continued.
- Set out rails and fitted panels to the installer's plan. Recorded module and inverter serial numbers, photographed completed labels and matched the site evidence to the job pack before handover.
- Reviewed 14 handover packs after two were returned for incomplete photos. Added a pre-departure check with the crew lead. All packs in the next ten-job review contained the required serial images.
- Separated unused and damaged items during pack-down. Reconciled returns against the pick sheet and tagged damaged stock for the stores team so it did not go straight back to issue.

Warehouse Assistant, Electrical Supplies

Saltpan Trade Distribution

2023-11 – 2025-04

- Picked components for residential crews and checked that brackets, fixings and labels matched the job order. Asked the supervisor to confirm substitutions before kits were dispatched.
- Kept small parts in labelled bins after reviewing frequently missed picks. Label comparison became part of the dispatch check for the most common installation kits.

Skills

Residential PV layout · Module fitting · Serial-number records · Site handover · Parts reconciliation
