Noor Avery Sinclair

Small-Animal Veterinary Technician

veterinary-technician@example.test · Ottawa, Canada

Clinical support record

48 procedure records — Sampled during a supervised handoff completeness review.

Six reusable discharge sheets — Revised with the clinical lead after recurring owner questions.

Education

Diploma in Veterinary Technology

Silver Marsh College

2025

Summary

Early-career veterinary technician supporting dog and cat appointments, inpatient monitoring and sample handling. Prepares clinical records and equipment for the veterinarian and keeps owners informed about agreed follow-up. Builds on two placements in small-animal care and shelter intake.

Experience

Veterinary Technician

Lantern Creek Animal Hospital

2025-05 – Present

- Prepare animals and equipment for scheduled procedures, monitor and record observations as assigned and flag changes to the supervising clinician. Confirm post-procedure ownership during handoff.
- Reviewed 48 procedure records with the clinical lead. Identified missing follow-up instructions and introduced a confirmation box. In the next review, incomplete records fell from nine to three out of 48.
- Revised six reusable discharge sheets with the veterinarian after reviewing common owner questions. Removed abbreviations and checked that each sheet named a callback route.
- Collect and identify samples within clinic policy. Verify matching labels and requisitions at dispatch and bring disagreements to the clinical lead before shipment.

Veterinary Technology Placement Student

Pinebough Animal Shelter Clinic

2024-10 – 2025-04

- Supported supervised intake appointments and recorded feeding and observation needs in the shelter system. Followed up with the next shift when arrangements changed.
- Reconciled supplies at the end of vaccination sessions and noted items requiring replacement. Helped organise the kit list in the same order as the supervised appointment.
