Priya Suresh

Web Developer · Subscription Commerce

web-developer@example.test
Singapore

Experience

2022-04 – Present **Web Developer**
Bayfern Commerce

- Split non-essential scripts and deferred below-the-fold media on the mobile product page. At the 75th percentile, Largest Contentful Paint fell from 3.4 to 2.1 seconds across successive four-week periods.
- Built checkout recovery after a payment cancellation. Restored cart contents, rechecked prices and made expiry states clear without retaining card data.
- Reworked focus order and status messages for keyboard navigation through the address form. Used keyboard and screen-reader checks with the design team before release.

2019-08 – 2022-03 **Junior Web Developer**
Copper Fern Studio

- Maintained page templates and fixed browser compatibility defects for three small retailers. Wrote regression cases for the shopping and account flows.
- Reviewed the event schema with analytics before releasing promotional pages. Checked that test transactions were excluded from campaign reports.

Skills

TypeScript · React · Node.js · Web accessibility · Browser performance · Integration testing

Summary

Web developer building and maintaining a subscription storefront. Owns account and checkout features across browser and server code, with particular attention to accessibility, payment handoffs and mobile performance.
